1–4 LOW	5–9 MEDIUM	10–15 HIGH	16–25 VERY HIGH
Continue with existing control, however monitor for changes. Implement any additional control measures required, within the timescales given in the risk assessment.	Requires attention to reduce the rating as well as regular ongoing monitoring. Implement any additional control measures required, within the timescales given in the risk assessment.	Requires immediate attention to bring the risk down to an acceptable level. Implement the control measures required, within the timescales given in the risk assessment and continue to review working practices to reduce the probability of an accident to the lowest possible level.	Stop immediately – the risk is too high. Take immediate action to reduce the risk to the lowest level possible.

Additional comments:

1. This risk assessment needs to be discussed with Castle Point astronomy club members to ensure compliance with all control measures through their understanding
2. Members are to sign an acknowledgement sheet for their understanding of this risk assessment
3. The risk assessment is to be reviewed on an annual basis, or sooner if changes are made to the plant or working practices, or after an accident/near miss
4. This risk assessment must be approved by the nominated person for health and safety before being issued as a live document
